SUMMARY

A certified full-stack developer as awarded by the prize-winning [4Geek's Academy](#), specialising in frontend development, with over 1 year's worth of project experience, a portfolio website, and 50+ repositories in GitHub. I use HTML(5), CSS(3), Bootstrap, JavaScript (EC6+), Jest, React.js, Git/GitHub, and APIs to build the frontend of webpages or applications, soon to be joined by TypeScript and Tailwind. Additionally, I have knowledge of backend development and using Python, SQL, SQL Alchemy and Flask to build APIs and manage databases.

PROJECTS

SWITCH

📅 2023

🔗 [Link](#)

An app designed by a small team using agile methodology to help with the creating and organising of in-person language exchange events. The app aims to make this process easier than other current apps, particularly for event organizers.

- Frontend: HTML, CSS, Bootstrap, JavaScript, React.
- Backend: Python, SQLAlchemy, Flask.
- Creation of an API and database for our application.

Personal Contributions:

- Created the entire project tasks board using [Trello](#) and conceptualised the entire user flow of the app using [Figma](#).
- Contributed over 47% of project's total commits on [GitHub](#).
- Integrated the image API Cloudinary into our project.
- Prepared and put our project into production on www.render.com.
- Presented the app live in the 4Geeks [Demo Day Presentation](#) in Spanish.

Star Wars Blog Site

📅 2023

🔗 [Link](#)

- A fan page website allowing users to see information about their favourite characters, planets and vehicles from the Star Wars fantasy universe.
- The site functions by fetching data from [SWAPI](#) (Star Wars API) and was made using React, JavaScript, Bootstrap and CSS.
